

Precision High-Voltage Resistors

Series MTX 968

Precision High-Voltage Resistors with wide ohmic range (400 Ω–30 GΩ)

The MTX 968 resistor series is designed for use in voltage dividers, medical equipment, electrostatic devices, measuring equipment and current limiting devices where high stability, low TCR, high ohmic values and high short-term loads are required.

For use in oil- or potted applications, EBG recommends the use of polyimide coating instead of silicone conformal coating. Please ask for details!

Specifications
