

60W, AC/DC converter

**cULus** **CE** **CB** **RoHS**

LH60-20Bxx(-DT) series AC-DC converters are highly efficient, environmental-friendly 60W power modules. It features high surge resistance, high efficiency, high reliability, low power consumption, high reinforced isolation. The converters are widely used in industrial control, power and switch applications. For extremely harsh EMC environment, we recommend using the application circuit show in Design Reference of this datasheet.

## FEATURES

- Wide input voltage range: 90 - 264VAC/122 - 370VDC; 55 - 264VAC/77 - 370VDC(LH60-20Bxx-DT Series)
- Low standby power consumption: 0.5W
- Conversion efficiency up to 86%
- High I/O isolation test voltage up to 4000VAC
- Output short circuit, over-current, over-voltage protection
- IEC60950, UL60950, EN60950 safety approval
- Mounting: PCB mounting, Chassis mounting, DIN-Rail mounting available

## Selection Guide

| Certification | Part No.*     | Output Power | Nominal Output Voltage and Current(Vo/Io) | Efficiency at 230VAC (%) Typ. | Capacitive Load (μF) Max. |
|---------------|---------------|--------------|-------------------------------------------|-------------------------------|---------------------------|
| UL/CE/CB      | LH60-20B05    | 50W          | 5V/10A                                    | 82                            | 80000                     |
|               | LH60-20B05-DT |              | 9V/6.6A                                   | 84                            | 28000                     |
|               | LH60-20B09    |              | 12V/5A                                    | 86                            | 14000                     |
|               | LH60-20B09-DT |              | 15V/4A                                    | 86                            | 12000                     |
|               | LH60-20B12    |              | 24V/2.5A                                  | 86                            | 4000                      |
|               | LH60-20B12-DT |              | 48V/1.25A                                 | 86                            | 1000                      |
|               | LH60-20B15    |              |                                           |                               |                           |
|               | LH60-20B24    |              |                                           |                               |                           |
|               | LH60-20B24-DT |              |                                           |                               |                           |

Note: 1.\* LH60-20Bxx series has input under-voltage protection; LH60-20Bxx-DT series has no input under-voltage protection.

2.\* Use suffix "A5" for chassis and suffix "A6" for DIN-Rail mounting.

## Input Specifications

| Item                            | Operating Conditions |          | Min. | Typ. | Max.        | Unit |
|---------------------------------|----------------------|----------|------|------|-------------|------|
| Input Voltage Range             | LH60-20Bxx series    | AC input | 90   | --   | 264         | VAC  |
|                                 |                      | DC input | 122  | --   | 370         | VDC  |
|                                 | LH60-20Bxx-DT series | AC input | 55   | --   | 264         | VAC  |
|                                 |                      | DC input | 77   | --   | 370         | VDC  |
| Input Frequency                 |                      |          | 47   | --   | 63          | Hz   |
| Input Current                   | 115VAC               |          | --   | --   | 1.4         | A    |
|                                 | 230VAC               |          | --   | --   | 0.7         |      |
| Inrush Current                  | 115VAC               |          | --   | 30   | --          |      |
|                                 | 230VAC               |          | --   | 50   | --          |      |
| Input Under-voltage Protection* | Start-up Voltage     | AC input | 65   | --   | 90          | VAC  |
|                                 |                      | DC input | 92   | --   | 122         | VDC  |
|                                 | Shutdown Voltage     | AC input | 55   | --   | 75          | VAC  |
|                                 |                      | DC input | 79   | --   | 105         | VDC  |
| Hot Plug                        |                      |          |      |      | Unavailable |      |

\* Only the LH60-20Bxx series has input under-voltage protection.

### Output Specifications

| Item                       | Operating Conditions                 | Min. | Typ.  | Max.                      | Unit |
|----------------------------|--------------------------------------|------|-------|---------------------------|------|
| Output Voltage Accuracy    |                                      | --   | ±2    | --                        |      |
| Line Regulation            | Full load                            | --   | ±0.5  | --                        | %    |

### Product Characteristic Curve

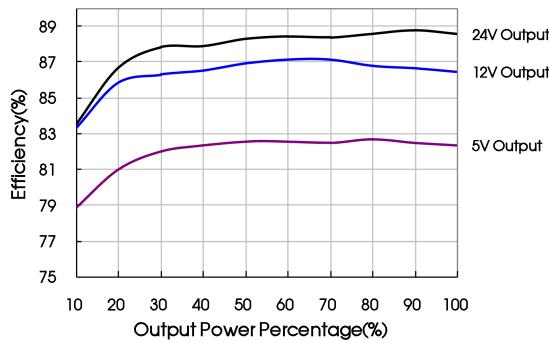

- Note:
- ① For LH60-20Bxx series, with an AC input between 90-110VAC and a DC input between 122-130VDC, the output power must be derated as per temperature derating curves;
  - ② For LH60-20Bxx-DT series, with an AC input between 55-110VAC and a DC input between 77-130VDC, the output power must be derated as per temperature derating curves;
  - ③ This product is suitable for applications using natural air cooling; for applications in closed environment please consult factory or one of our FAE.

Efficiency Vs Input Voltage(Full Load)

Efficiency Vs Output Load(Vin=230VAC)

## Design Reference

### 1. Typical application

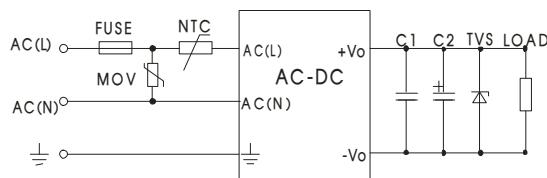

Fig. 1

| Part No.        | FUSE | NTC | MOV | C1(μF) | C2(μF) | TVS      |
|-----------------|------|-----|-----|--------|--------|----------|
| LH60-20B05(-DT) |      |     |     |        | 680    | SMBJ7.0A |
| LH60-20B09(-DT) |      |     |     |        | 470    | SMBJ12A  |
| LH60-20B12(-DT) |      |     |     |        | 330    | SMBJ20A  |
| LH60-20B15      |      |     |     |        | 330    | SMBJ20A  |
| LH60-20B24(-DT) |      |     |     |        | 200    | SMBJ30A  |
| LH60-20B48      |      |     |     |        | 100    | SMBJ64A  |

#### Output Filter Components:

We recommend using an electrolytic capacitor with high frequency, and low ESR rating for C2 (refer to manufacturer's datasheet). Choose a Capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C1 is a ceramic capacitor used for filtering high-frequency noise and TVS is a recommended suppressor diode to protect the application in case of a converter failure.

### 2. EMC compliance recommended circuit

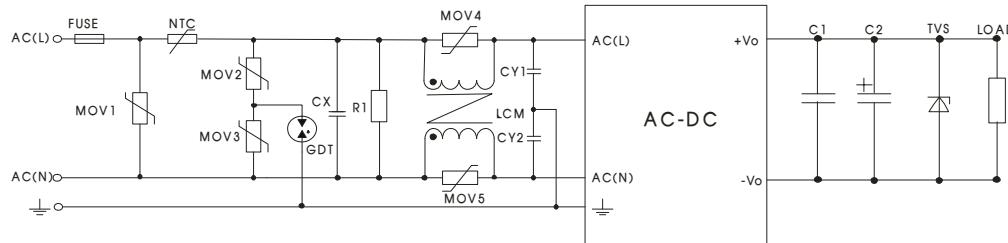

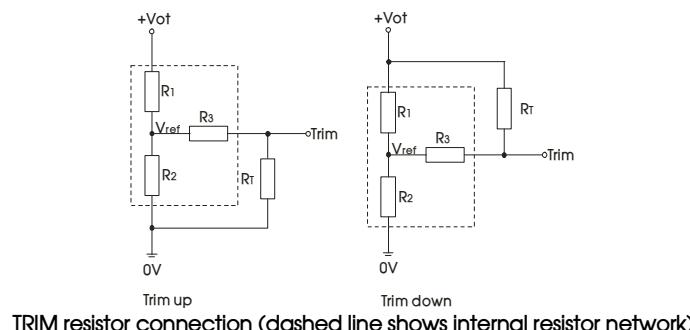

Fig 2

(Output external circuit refer to the typical application circuit)

| Component | Recommended value | Component | Recommended value                                            |
|-----------|-------------------|-----------|--------------------------------------------------------------|
| MOV1      | S20K350           | CY2       | 2.2nF /400VAC                                                |
| MOV2      | S14K350           | R1        | 1M Ω /2W                                                     |
| MOV3      | S14K350           | LCM       | 2.2 mH,<br>we recommend using part no. FL2D-30-222 (MORNSUN) |
| MOV4      | S10K350           | GDT       | B5G3600                                                      |
| MOV5      | S10K350           | NTC       | 5D-14                                                        |
| CX        | 0.15μF/300VAC     | FUSE      | 3.15A/250V, slow-blow, required                              |
| CY1       | 2.2nF/400VAC      | --        | --                                                           |

### 3. Trim Function for Output Voltage Adjustment (open if unused)

TRIM resistor connection (dashed line shows internal resistor network)

Calculating Trim resistor values:

$$\text{up: } R_T = \frac{\alpha R_2}{R_2 - \alpha} - R_3 \quad \alpha = \frac{V_{ref}}{V_{ot} - V_{ref}} \cdot R_1$$

$$\text{down: } R_T = \frac{\alpha R_1}{R_1 - \alpha} - R_3 \quad \alpha = \frac{V_{ot} - V_{ref}}{V_{ref}} \cdot R_2$$

$R_T$  = Trim Resistor value;  
 $\alpha$  = self-defined parameter;  
 $V_{ot}$  = desired output voltage

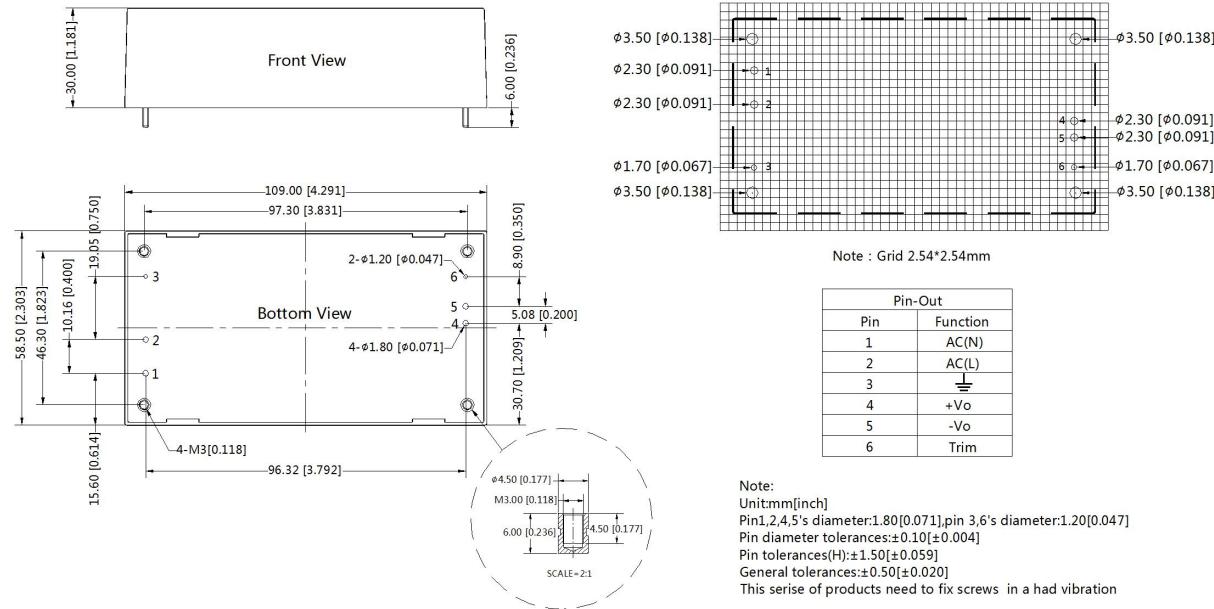

| Vout | R1(KΩ) | R2(KΩ) | R3(KΩ) | Vref(V) | Vot(V) |
|------|--------|--------|--------|---------|--------|
| 5V   | 3.3    | 3.3    | 1      | 2.5     |        |
| 9V   | 4.7    | 1.8    | 1      | 2.5     |        |
| 12V  | 3.83   | 1      | 1      | 2.5     |        |
| 15V  | 7.5    | 1.5    | 1      | 2.5     |        |
| 24V  | 8.66   | 1      | 1      | 2.5     |        |
| 48V  | 33     | 1.8    | 1      | 2.5     |        |

Resulting Trimmed  
Output voltage;  
range  $\leq \pm 10\%$

## Dimensions and Recommended Layout

THIRD ANGLE PROJECTION

A5 Chassis mounting Dimensions

THIRD ANGLE PROJECTION

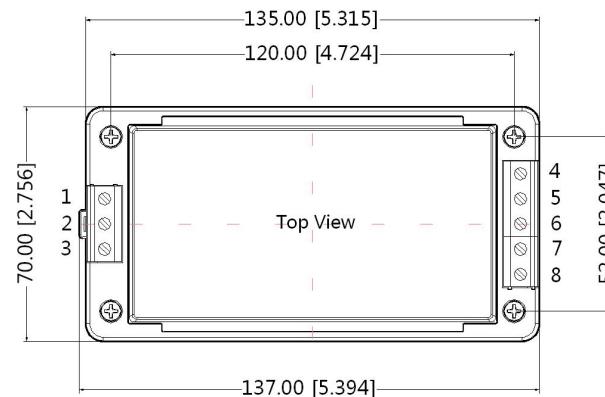

| Pin-Out |          |
|---------|----------|
| Pin     | Function |
| 1       | AC(N)    |
| 2       | AC(L)    |
| 3       | GND      |
| 4       | NC       |
| 5       | NC       |
| 6       | +Vo      |
| 7       | -Vo      |
| 8       | Trim     |

Note:  
Unit:mm[inch]  
Wire range:24~12 AWG  
General tolerances:±1.00[±0.040]

A6 Din-Rail mounting Dimensions

THIRD ANGLE PROJECTION

| Pin-Out |          |
|---------|----------|
| Pin     | Function |
| 1       | AC(N)    |
| 2       | AC(L)    |
| 3       | GND      |
| 4       | NC       |
| 5       | NC       |
| 6       | +Vo      |
| 7       | -Vo      |
| 8       | Trim     |

Note:  
Unit:mm[inch]  
Installed on DIN RAIL TS35  
Wire range:24~12 AWG  
General tolerances:±1.00[±0.040]

Note:

1. For additional information on Product Packaging please refer to [www.mornsun-power.com](http://www.mornsun-power.com). Packaging bag number: 58220020(Horizontal package), 58220031(A5/A6 package);
2. If the product is not operated within the required load range, the product performance cannot be guaranteed to comply with all parameters in the datasheet;
3. Unless otherwise specified, parameters in this datasheet were measured under the conditions of  $T_a=25^{\circ}\text{C}$ , humidity<75% with nominal input voltage and rated output load;
4. All index testing methods in this datasheet are based on our company corporate standards;
5. We can provide product customization service, please contact our technicians directly for specific information;
6. Products are related to laws and regulations: see "Features" and "EMC";
7. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units.
