10W, DIY AC/DC converter

Note

FEATURES

• Ultra-wide 85 - 305VAC and 90 - 430VDC input voltage range

MORNSUN®

- Accepts AC or DC input (dual-use of same terminal)
- Operating ambient temperature range: -40°C to +85°C
- Multi application, flexible layout
- Compact size, high power density, green power
- No-load power consumption as low as 0.1W
- Output short circuit, over-current protection
- Designed to meet IEC/EN61558, IEC/EN60335 standards
- Designed to meet IEC/EN/UL62368 standards (Approval pending)

LS10-13BxxR3P(-F) series is one of Mornsun's highly efficient green power AC-DC Converter series. They feature wide input range accepting either AC or DC voltage, high reliability, low power consumption and reinforced isolation. All models are particularly suitable for industrial control, electric power, instrumentation and smart home applications which have high requirement for dimension and don't have high requirement on EMC. For extremely harsh EMC environment, we recommend using the application circuit show in Design Reference of this datasheet.

Certification	Part No.	Output Power	Nominal Output Voltage and Current (Vo/Io)	Efficiency at 230VAC (%) Typ.	Capacitive Load (uF) Max.
	LS10-13B03R3P	6.6W	3.3V/2000mA	70	1500
	LS10-13B05R3P		5V/2000mA	77	1500
CE/UL/CB	LS10-13B09R3P		9V/1100mA	80	1000
(Pending)	LS10-13B12R3P	10W	12V/830mA	83	680
	LS10-13B15R3P		15V/670mA	83	470
	LS10-13B24R3P		24V/420mA	84	330
	LS10-13B03R3P-F*	6.6W	3.3V/2000mA	70	1500
	LS10-13B05R3P-F		5V/2000mA	77	1500
CE	LS10-13B09R3P-F		9V/1100mA	80	1000
(Pending)	LS10-13B12R3P-F	10W	12V/830mA	83	680
	LS10-13B15R3P-F		15V/670mA	83	470
	LS10-13B24R3P-F		24V/420mA	84	330

Note: 1. The nominal output voltage refers to the voltage applied to the load terminal after adding external circuits;

2. If the product is used in a severe vibration application, it needs to be glued and fixed.

3. *An "-F" suffix designates horizontal package vs. standard vertical mounting.

Input Specifications					
Item	Operating Conditions	Min.	Тур.	Max.	Unit

Product Characteristic Curve

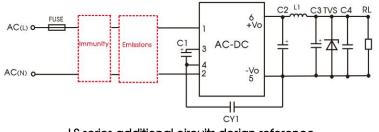

Note:

① With an AC input between 85 -100VAC/277-305VAC and a DC input between 90 - 140VDC/390 - 430VDC, the output power must be derated as per temperature derating curves;

(2) This product is suitable for applications using natural air cooling; for applications in closed environment please consult factory or one of our FAE.

Noto							

Note:

1. C1 is used as filter capacitor with AC input (must be connected externally) and as EMC filter capacitor with DC input (must be connected), and it is recommended to use the capacitor with ripple current >300mA@100KHz.

2. We recommend using an electrolytic capacitor with high frequency and low ESR (ESR of C3 at low temperature of -40° C \leq 1.1 Ω) rating for C3 (refer to manufacture's datasheet), electrolytic capacitor can be used for C2 when applied in normal and high temperature environments. Combined with C2, L1, they form a pi-type filter circuit. Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%, C4 is a ceramic capacitor, used for filtering high frequency noise.

3. A suppressor diode (TVS) is recommended to protect the application in case of converter failure and specification should be 1.2 times of the output voltage.

4. LDM (1.2mH, P/N: 12050314), L1 (2.2uH, P/N: 12050504) Mornsun quotation is available.
