Note on filter components:

We recommend using an electrolytic capacitor with high frequency and low ESR rating for C2,C4,C6 (refer to manufacture's datasheet). Choose a Capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C1,C3,C5 are ceramic capacitor, used to filter high-frequency noise. TVS is a recommended suppressor diode to protect the application in case of a converter failure.
